

Model 100 "Producer" Power unit

Features:

- Continuously adjustable output power from 0-25 volts.
- 100 watts of power.
- Rugged SCR circuitry, and low internal impedance.
- Mark (AC) & Etch (DC) modes.

The Model 100 is a medium power etching machine suitable for low volume applications. It has variable output voltage (0-25), low impedance, SCR phase control circuitry, and 100 watts of output power. Depths of etch of up to 0.006" can be achieved. However, this machine is more suited for marking (AC mode) applications.
